

Addendum #2: MVRTA -Security Camera System RFP- G2077

Date: Friday, March 26, 2021

From: Kathleen Lambert, Assistant Administrator

To: All Interested Parties

cc. Joe Costanzo, Administrator; file

---

Reminder: Proposals are due April 2, 2021 to the MVRTA Administration offices at:

85 Railroad Avenue, Haverhill, MA 01835

Proposals must arrive before 3PM.

Proposals received after the date and time specified above will be rejected and will not be considered. The proposer is fully responsible for the delivery of the proposal. Reliance upon mails or public courier is at the proposer's risk. Emailed proposals are not acceptable and the deadline will not be extended.

Clarifications of RFP based on questions submitted by Proposers:

Q1 The 110v Converters at Gateway were not part of the original scope. Do you intend that the vendor would rewire and replace these converters or is MVRTA going to perform the work?

A: There is no 110V converter needed if you use the axis T8154, this will sit in the camera mount which is why the existing 110 power needs to be extended up the pole.

Q2 How many cameras per switch are required per switch at Haverhill the proposer is confused about the number needed and he says it would affect the price.

A: Specific switches were not spec'd for this job, so it is up to the vendor to make sure the switch has enough ports and power +20% for the cameras. There are currently (2) 8-port switches in the outdoor cabinet and (2) 24-port switches in the server rack that need to be replaced.
