

Addendum #1 to RFP for Access Control Upgrades

The following addendum amends the G-2308 RFP for Access Control Upgrades issued on March 6, 2024. This addendum provides an update to the schematic drawing for the McGovern Facility.

Although the possibility of adding several additional doors at this facility was discussed in the pre-proposal walk thru, MEVA has decided that only 1 additional door will be added to the scope at this time. The mechanism will be the same reader as the other 4 doors.

The schematic located on page 21 of the original RFP document will be replaced with the schematic enclosed herein.

The issuance of this addendum in no way changes the current published schedule for this RFP.
